@MJogoh

Objective

Entry Software Engineer helps team develop ideas and implement code on various products while gaining valuable experience with latest technologies and tools. Applies knowledge and skills acquired from coursework on software and hardware user interfaces, back-end systems architecture and more, Home problem-solving skills to keep project moving forward. I am looking for a challenging job with a rapidly growing organization that can provide me with a range of goals and job objectives within a contemporary and economical business setting.

Experience

Feb, 2021 - August, 2021

The Code Center
Web Developer Intern

Collaborated with UI/UX teams to test and integrate new designs features and capabilities

Employed programming languages to design both front and backend assets

Expanded programming language aptitudes to increase available development paths on project

Improved coding of Htmls, JavaScript, Node.js, MongoDB, MySQL, PostgreSQL, React.js and CSS to enhance user experience and functionality

 Solid understanding of databases and Api •

Validate the structure, security and compliance of website code

 Performed QA analysis on [Mocha and Chai] to determine user friendliness and catalog bug, malfunctions or incompatibility issue prior to final release

 Presented reports to clients and external stakeholders to provide valuable information on progress and unforeseen obstacles.

September , 2021 - December , 2021

Uleval SL
Backend Developer
• Build rest APIs using express.js .
• Develop all server -side logic , including data storage to optimize web site performance
• Testing APIs with mocha and chai and validate web application to be different browser.
• Collaboration with frontend developers.
• Create clear , simple and reusable code.

Dec, 2021 -

Robots Limited
Software Engineer

 Software Engineer adept at working with customers, team members and project leaders to accomplish software engineering and updating tasks according to timelines.

Solid understanding of full development lifecycle, Skilled working with wide range of front and back-end technologies to produce evaluate code.

Collaborate access teams to solve technical issues and challenges.

Participate in design and code reviews to gain knowledge of applicants and development processes.

Produce clean, tight code to create well-functioning software applications.

Tested and recommended software improvements to guarantee strong functionality and optimization.

Experience with efficient core data structure usage and asynchronous programming .

Solid understanding of databases and api

Built APIs, libraries and tools to power engineer and operations.

Ambitious, quick to learn and takes ownership.

Skills

Problem solving skills

Data structure and algorithm

Database

Node.js

JavaScript

Team building

MongoDB

SQL

MySQL

Git and GitHub

postgreSQL

React.js

Plan Agile sprints

Task Prioritization

Creative Thinking

Boostrap

Docker

Html5

Css

Rest

SQL

Typescript

Scrum

Object oriented

Functional programming

Projects

Shelby blog

Shelby blog is a project , which I built using Node.js and embedded javaScript(ejs), html5 and Boostrap.

User is able to sign up and login

User can login to dashboard

User is able to post a blog and delete or edit the blog.

User can update and delete account.

But user can't delete other users post and comment on a comment.

Node Js , passport and authentication

Node Js passport and authentication was based on users able to sign up and login into dashboard. And encrypted password in the database (MongoDB).

Calculator

I built a calculator using javascript, html5 and css. By creating an array and accessing each with queryselector. And using switch case.

Tic tac toe

Built a tic tac toe game using react.js.

Player x always starts the game

It checks for win , draw or lose

Event handler

Using functional component

Hooks (useState) for state management of the game.

Node Js and postgreSQL

Node.js and postgreSQL project was based on sign up and login authentication. postgreSQL is a relational database.
I did a data migration from noSQL (MongoDB) to a relational database (postgreSQL)

Achievements & Awards

Freecodecamp - data structure and algorithm

Hacker rank - node.js intermediate certificate

Sololearn - React Js certificate

Personal Details

Marital Status : Male
Nationality   : Nigerian
Github   : http://www.github.com/michaeljogoh

Education

2017   **St Anthony High School, Ilorin, Kwara state.**
                             Ssce
                             3.6
